SESSIONS SUMMARY

"All the Alternatives to Diesel"

A great deal of attention has been given to electric powered buses, but are there other alternatives that provide emission reductions with near-zero options that are cost effective? This session will compare all four power sources; Diesel, Propane, Gasoline, and EV including range capabilities, vehicle costs, infrastructure costs, and the energy costs to operate these buses. This session will also address a total cost of ownership for each power source.

Presented by: Steve Whaley, Blue Bird

"Safety Points for Winter Travel"

The winter weather can create dangerous situations on the roadways. Commercial vehicles have the responsibility to ensure the roof is clear of snow and ice to protect other vehicles around them. By equipping your vehicles with the right features and following best practices, you can minimize risks and ensure successful winter travel. Learn about the rules and safety aspects of winter weather.

Presented by: , Rite Hite

"Mirror Technology Updates"

School bus mirrors play a crucial role in ensuring the safety of students and drivers. Over the years, manufacturers have developed various technologies to improve mirror design, functionality, and adjustability. Learn about some key advancements.

Presented by: Joel Caitlin, Rosco

"Wisconsin CDL Updates"

Updated information on licensing and testing extensions and regulation waivers. Current statistics of school bus drivers in Wisconsin. Various other CDL updates and information.
